amirmustafaa1@gmail.com · www.amirmustafaa.com · [www.github.com/amirmustafaa](https://github.com/amirmustafaa)

Inquisitive and creative software developer with experience developing useful projects that utilize Java and JavaScript along with frameworks such as Spring Boot and React. An engaged team player seeking a full-time opportunity in software development.

EXPERIENCE

FILM BUFF HEAVEN

[HTTPS://WWW.FILMBUFFHEAVEN.COM](https://www.filmbuffheaven.com)

A movie recommendation website that uses The Movie Database API to give users information about a movie. Users can also create movie based lists. Built using React, Spring Boot, and PostgreSQL.

MONEY PORTAL PRO

[HTTPS://WWW.MONEYPORTALPRO.COM](https://www.moneyportalpro.com)

A financial tracking website that allows users to track transactions and create a weekly, monthly, or yearly budget. Built using React, Spring Boot, and PostgreSQL.

GIANT BUG TRACKER

[HTTPS://WWW.GIANTBUGTRACKER.COM](https://www.giantbugtracker.com)

An easy to use bug-tracking website that allows users to track bugs in their projects and collaborate with team members. Users can freely create multiple projects and track their progress from beginning to end. Built using React, Node.js, Express, and MongoDB.

COMPUTER NETWORKING PROJECT

A research project that compared the performance between the Transmission Control Protocol and a reliable version of the User Datagram Protocol across different programming languages and distances. My responsibility was to test the performance of the Transmission Control Protocol protocol using Java.
